why me?

- Generate insights from data. ✓
- Excellent R & Tableau skills. ✓
- Eager to work in a team. ✓
- Self-reliant and flexible. ✓
- Excellent German & English. ✓
- Guidance and teaching. ✓
- Open-minded. ✓

interests

I have a strong interest in **nature**, **society** and **politics**, and I am **up-to-date** in these fields. Anything **aesthetic** attracts my attention: I love the beauty of the **small things**.

university of potsdam
graduate studies in biology
diploma >> 1.7 (1 being best)

09 / 1999 - 08 / 2001
university of giessen
undergraduate studies in biology

attitude

I prefer a **holistic attitude** to tackle challenges. I analyse and communicate information in an **honest**, **unbiased** manner allowing for objective, **evidence-based decision making**. This implies good **knowledge** of a specific system and how information was obtained from it. I believe that **communication** has to be **efficient** and **effective** to generate **sustainable results**.

approach

Profound knowledge is always the starting point. I appreciate working in a **team** to reach **maximum success**. At the same time, all **team members** have to have their own areas to **thrive** and **show personal performance**.
